1.0 **PURPOSE/SCOPE:** This action will allow the Authority to improve the security and post incident recording at various GCRTA locations by doubling the number of cameras in the security system. It will give the Safety, Service Quality and Transit Police Departments the ability to better monitor this system thus providing increased security to passengers.

2.0 **DESCRIPTION/JUSTIFICATION:** The Authority needs a service provider to supply and install 120 cameras and related equipment at 18 GCRTA locations. The majority of the work will take place in and around the Rapid Transit Stations. The cameras will connect to a digital video recorder supplied by GCRTA. This procurement will augment security at these locations by providing the ability to monitor activities of incidents real time and to review incidents after they occur for post-incident documentation. This post-incident documentation is the type of video that is used to identify suspects and to serve as evidence in criminal matters. With the ability to independently review the area when 911 calls are received from the Blue Light telephones, the police dispatcher can effectively describe the activities to the responding officer, or in the case of false calls, not deploy field resources, thus saving time and fuel. The contractor will provide all parts and labor for this project. GCRTA designated the type of cameras required at each location.

3.0 **PROCUREMENT BACKGROUND:** Requests for Proposals were downloaded from the GCRTA web site for this solicitation, and five proposals were received. After evaluation by a panel of Authority employees in accordance with established Procurement Department policies and procedures, and after negotiations, the proposal of Zadar Technology, Inc. to provide said equipment and services was selected as the most advantageous to the Authority, cost and other factors considered.

Zadar Technology, Inc. is a privately owned, full service company that specializes in Closed Circuit TV, Digital Video Recording, and other Security and Access Control solutions. They work with local commercial and governmental institutions including health care facilities, banks, correctional facilities, airports, law enforcement facilities and schools. Zadar Technology, Inc. has worked with GCRTA for over 12 years, having supplied and installed much of the existing CCTV and related equipment located throughout its various facilities.

A cost analysis has been performed and the Procurement Department has determined that the price of Zadar Technology, Inc. is fair and reasonable to the Authority.
