- 1.0 **PURPOSE/SCOPE:** This action will allow the Authority to renew a sole source contract for software maintenance and support of the Riskmaster program for a period of three years.
  
- 2.0 **DESCRIPTION/JUSTIFICATION:** In 1999, the Authority purchased an integrated risk management software system to assist the workers' compensation and liability claims adjusters in their claims handling and adjusting duties. The system provides critical statistical reporting capabilities for internal and external reporting, including regulatory requirements. The system was upgraded in 2015. This agreement is necessary to continue the support of the software program and maintain the database, which contains file information related to third-party and workers' compensation claims and/or general claims. This contract will cover technical support via telephone, internet, or at the vendor's offices. Computer Sciences Corporation, a DXC Technology Company ("CSC"), will provide new releases and enhancements to the software program and debugging efforts, if necessary. The Riskmaster application is a proprietary product designed and supported exclusively by CSC.
  
- 3.0 **PROCUREMENT BACKGROUND:** Section 306.43(H)(3) of the Ohio Revised Code states that competitive bidding is not required when the expenditure is for a renewal or renegotiation of a lease or license for telecommunications or electronic data processing equipment, service or systems, or for the maintenance thereof as supplied by the original source or its successors or assigns. CSC is the original installer of this software. After negotiations, CSC offered to provide technical support maintenance and support services for the Riskmaster software program in an annual amount not to exceed \$35,850.72 for a total amount not to exceed \$107,552.16 for the three-year period. This is the same annual amount that was paid under the previous contract and approximately 21% below the estimate for this purchase. The Information Technology Department reviewed the offer for adherence to technical scope.  
  
 A price analysis has been performed and the Procurement Department has determined that the price is fair and reasonable to the Authority.
  
- 4.0 **AFFIRMATIVE ACTION/DBE BACKGROUND:** All Affirmative Action requirements have been met. A 0% DBE goal was established for this procurement because it is for the maintenance of proprietary software. This work is exclusive to the original software provider and/or installer.
  
- 5.0 **POLICY IMPACT:** Does not apply.
